LNCT Bhopal (RGPV)

- Master of Computer Application
- 2023 2025 (Expected)

C.S.A Govt. College, Sehore [M.P.]

- Bachelor of Science in Computer Science
- Year 2020 2023

PROJECTS

Project - 1:

• Title: AI Web App for Face & Object Detection

Technologies: HTML, CSS, JavaScript, AWS Cloud

Developed an AI web app for detecting faces and objects in user-uploaded images using machine learning and computer vision. The app provides real-time detection with a responsive, user-friendly interface, optimized for efficient image processing across devices. It is scalable to handle large datasets with high accuracy.

Roles and Responsibilities:

- Developed both front-end and back-end of the web app.
- Designed a responsive, user-friendly interface for image uploads and detection results.
- Optimized back-end for fast and efficient image processing.
- Developed RESTful APIs for seamless front-end and back-end communication.

Project - 2:

• Title: Hop Cafe - Full-Stack Restaurant Website

• Technologies: MERN Stack (MongoDB Atlas, Express.js, React.js, Node.js)

Developed a full-stack web application allowing users to view the restaurant menu and make online reservations. Implemented user-friendly UI/UX for seamless interaction. Integrated backend API for menu updates and real-time reservation handling.

Roles and Responsibilities:

- Integrated a back-end API for menu updates and reservation management.
- Tested and debugged the application for smooth functionality.
- Optimized the back-end for efficient data handling and quick response times.
- Designed a user-friendly interface for browsing the menu and making reservations.

Project - 3:

• Title: Hopify - Music Streaming Platform

• Technologies: HTML, CSS, Javascript

Developed a sleek and responsive music player web application using HTML, CSS, and JavaScript. The platform allows users to play, pause, and navigate through tracks with an intuitive and visually appealing interface. Designed with smooth animations and a user-friendly layout to enhance the listening experience.

Roles and Responsibilities:

- Designed and developed a modern UI with CSS animations for an engaging user experience.
- Implemented JavaScript-based audio controls for seamless music playback.
- Optimized responsiveness to ensure smooth functionality across different screen sizes.
- Enhanced interactivity with dynamic track selection and playback controls.

Project - 4:

• Title: HopShop - Full Stack Ecommerce Platform

• Technologies: MERN Stack (MongoDB Atlas, Express.js, React.js, Node.js), Stripe

Developed a feature-rich full-stack e-commerce platform that enables users to browse products, add them to the cart, and complete secure transactions. The platform integrates a robust user authentication and authorization system, ensuring secure access and personalized experiences. Designed with a fully responsive interface, HopShop offers seamless navigation across all devices. Efficient API integration enables smooth data communication between the front-end and back-end, enhancing performance and user satisfaction.

Roles and Responsibilities:

- Implemented user authentication and authorization for secure access and personalized shopping experiences.
- Designed and developed a dynamic product catalog with seamless search and filter functionalities.
- Optimized the back-end for efficient order processing and real-time inventory management.
- Ensured a responsive and visually appealing UI for an intuitive user experience across all devices.
